

BRIDGEWATER CANAL IN SALFORD

Imagine an Insect

Collect leaves, twigs, seeds, petals and any other natural materials that you find along the canal to make your own special insect.

- ◇ What is it called?
- ◇ Describe where it lives, how it moves, what it eats.
- ◇ Is its body specially adapted in any way?
- ◇ Does it use camouflage to hide from predators?
- ◇ Can it fly?
- ◇ How does it attract its food?
